

How to Clean Teething Toys

Boiling Teethers

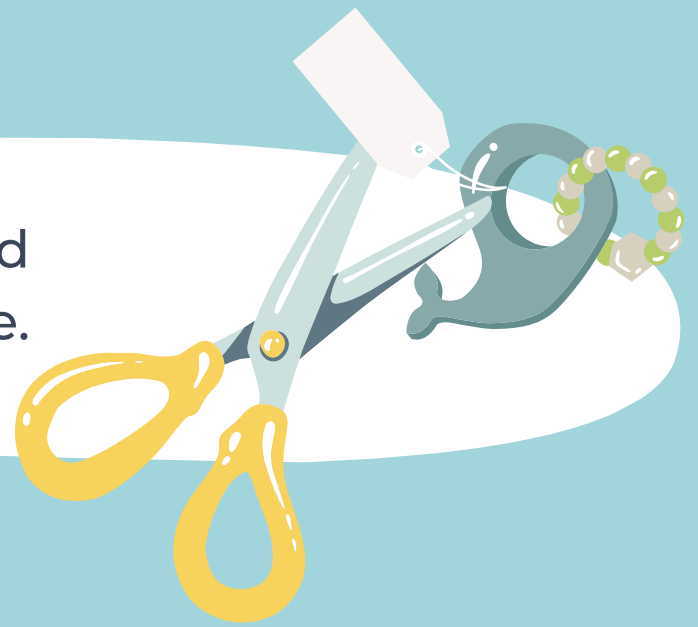

Read instructions to ensure teether is safe to boil.

1

2

Remove labels or tags and clean to remove any residue.

Use a clean pot and add water so the teethers will float and not touch the bottom.

3

4

Bring the pot to a roiling boil.

Carefully place teethers into the boiling water for about 5 minutes and allow the heat to kill the germs.

5

6

Remove, cool, and dry thoroughly.
